

# 144K

Your production will shine with the **DC 144K LIGHT**. It's 144 thousand watts of natural looking light handles most exterior lighting scenes with ease. The **DC 144K** offers "camera friendly" flicker-free tungsten bulbs, ensuring that no matter what the camera speed each frame is perfect.

## **BRILLIANT DESIGN**

The **DC 144K LIGHT** features four independently controlled panels, each housing 36 1K bulbs. The independent panels offer an extensive pan and tilt range and individual gelling to ensure a high degree of versatility. These heads are then grouped on a fully articulating main bracket to maximize flexibility.

The **DC 144K LIGHT** can be radio controlled, right from the camera!

## **THE ABILITY TO RISE ANYWHERE**

This unique light can be positioned up to heights of 150' to ensure dynamic front and back lighting. The boom also offers complete articulation, so it fully adjusts to fit into tight spaces. Designed for fast and easy set-up, the **DC 144K LIGHT** even gives you the option of parking off the street and back or front lighting your scene by booming over it, all the while keeping the crane out of your shot.

**To see how the DC 144K LIGHT will make a hot addition to your production, call 416-287-3107 for a free video.**
